22 of 23 review helpful A mosaic By Ernie Sharp Many reviewers here complained that the book went too far into drugs the life stories of the characters and other details I guess they were expecting a fantasy novel where Americans show up kick butt Rambo style and then emerge victorious That isn't the story here This is a tale of how the American boys who went to war became men This is about how society at the time worked A work that has served as a literary cornerstone for the Vietnam generation The 13th Valley follows the strange and terrifying Vietnam combat experiences of James Chelini a telephone systems installer who finds himself an infantryman in territory controlled by the North Vietnamese Army Spiraling deeper and deeper into a world of conflict and darkness this harrowing account of Chelini's plunge and immersion into jungle warfare traces his evolution from a semipacifist There have been a number of excellent books about Vietnam but none has managed to communicate in such detail the day to day pain discomfort frustration and exhilaration of the American military experience in Vietnam Joe Klein The New York Times Book
