12 of 13 review helpful This Book is an Excellent Warning to NATO By JB Sir Richard Shirreff is right about many things in this book The way in which the war was initiated by the Russians is very plausible indeed Russia rescuing its oppressed citizens in Latvia is very believable Of all the Baltic states Latvia has the largest population of Russians and it s obvious that Russians would pick that state to invade first The rapid rise in Russia s power over the course of the last ten years has been matched by a stunning lack of international diplomacy on the part of its president Vladimir Putin One consequence of this when combined with Europe s rapidly shifting geopolitics is that the West is on a possible path toward nuclear war Former deputy commander of NATO General Sir Richard Shirreff speaks out about this very real peril in this call to arms a novel that is a barely disguised Sunday Times Bestseller You fail to read this book at your peril Admiral James G Stavridis US Navy former Supreme Allied Commander Europe A good and authentic if gloomy read
